Professional Summary

Motivated and dedicated Information Technology student currently pursuing a Diploma in Information Technology (Software Development) at Belgium ITiversity, Pretoria Campus. Passionate about designing and developing software solutions that solve real-world problems through clean, efficient and maintainable code.

Skilled in C#, JavaScript, SQL, HTML, CSS, and ReactJS, with practical experience developing full-stack web applications, database-driven systems and desktop applications through academic and personal projects. Familiar with object-oriented programming, database design, version control using GitHub and responsive web development.

A quick learner with strong analytical, problem-solving, and communication skills who enjoys collaborating in team environments while also working independently. Seeking an internship opportunity where I can apply my technical knowledge, gain industry experience, contribute to software development projects and continue growing as a software developer.

Education:

Die Hoërskool Wonderboom

National Senior Certificate (Matric Certificate)

Belgium ITiversity, Pretoria Campus

Diploma in IT: Software Development

2024 – Present

Relevant Modules:

- Software Development
- Database Development (SQL)
- Web Development (HTML, JavaScript, ReactJS)
- Systems Analysis & Design

Technical Skills:

Programming Languages:

- C#
- JavaScript
- SQL
- HTML
- CSS

Frameworks & Technologies:

- ReactJS
- Object-Oriented Programming
- REST APIs

Databases:

- Microsoft SQL Server

Tools:

- GitHub
- Visual Studio
- Visual Studio Code

Concepts:

- Front-end Development
 - Back-end Development
 - Database Design
 - Responsive Web Design
-

Projects:

Math Tug-of-War:

- Description
 - Developed a multiplayer educational application where two students compete in a tug-of-war game by answering mathematics questions with selectable difficulty levels. The application included a backend server that stored player scores and managed game data.
- Technologies
 - ReactJS
 - JavaScript
 - HTML
 - CSS
 - Backend API
- My Contribution
 - Developed the complete front-end interface.
 - Connected the front-end with the backend server.
 - Implemented communication between application components to ensure data flowed correctly throughout the system.
- Outcome
 - Successfully delivered a functional educational game that allowed players to compete while storing scores through a backend database.

Web-portfolio:

- Description
 - Designed and developed a personal portfolio website showcasing my GitHub projects, LinkedIn profile, and contact information. The website also includes an email contact feature for visitors.

- Technologies
 - ReactJS
 - JavaScript
 - HTML
 - CSS
 - Backend API
- My Contribution
 - Developed both the front-end and backend.
 - Integrated the contact form with the backend.
 - Deployed both the frontend and backend to online hosting platforms and configured communication between them.
- Outcome
 - Created a professional online portfolio that showcases my work and provides employers with an easy way to contact me.

Gym-Membership:

- Description
 - Developed a C# desktop application connected to a SQL database for managing gym employees and members, including adding, updating, and removing records.
- Technologies
 - C#
 - SQL Server
- My Contribution
 - Developed the login functionality.
 - Tested the application to identify and resolve bugs.
 - Assisted with validating system functionality.
- Outcome
 - Produced a functional database-driven management system that simplified employee and membership administration.

Database-Creation:

- Description
 - Designed and implemented a relational SQL database based on an existing dataset, including creating tables, defining relationships, and writing queries for filtering and retrieving information.
- Technologies
 - SQL
 - Microsoft SQL Server
- My Contribution
 - Created the initial database structure.
 - Designed relationships between tables.
 - Tested database functionality and verified data integrity.
- Outcome
 - Successfully produced a normalized database capable of storing and retrieving information efficiently.

Work Experience:

4Trek Adventures – Assistant (Part-Time): 4 December 2023 – 31 March 2026

Reason for leaving: Prioritising of studies

- Updated product pricing and managed listings on the online platform.
 - Added and removed products as required.
 - Assisted on-site with promotions and team-building events.
 - Gained experience in teamwork, responsibilities and communication.
-

Soft Skills:

- Team Leader
- Problem-solving
- Teamwork
- Communication
- Time management
- Adaptability

Technical skills:

- Web Design
 - Web Services
 - Web Content Writing
-

Additional Information:

- South African Citizen
 - Valid driver's license with own reliable transport
 - Available for internship opportunities
-
